

RU 2020 GRG Student's Profile

Mathye Masesabona Cathrine

University: University of the Free State, South Africa

Program: MSc. Environment and Natural Resources Management

GRG Project: Can pastoral grazing systems contribute to climate change mitigation? Gathering evidence and exploring future scenario's in the Grassland Biome of South Africa

Research Focus: The impact of livestock grazing systems on the below-ground carbon in the grassland and Savanna biomes

About me: I enjoy outdoor activities like travelling, exploring new places, connecting with people from diverse backgrounds and learning different things. I am passionate about contributing to scientific knowledge and educating people on various aspects of agriculture. I want to contribute to improving food security and sustainable agriculture issues in this climate change. In my free time, I love to cook, go to church and volunteer in places like retirement homes and schools, where I spread love and kindness to other people. I am also interested in reading self-development books to empower myself with more knowledge.

My favourite quote:

"Be the change that you wish to see in the world." —*Mahatma Gandhi*
